SUMMARY

I am an Information Technology graduate with a strong passion for coding and problem-solving. I primarily work with Java (Core and Advanced), and have a solid understanding of front-end technologies as well. I am eager to grow as a software developer, contribute to impactful projects, and be part of a forward-thinking organization where I can help develop reliable, user-focused products and services.

SKILLS

- **Programming Languages:** C/C++, Java
- **Web Technologies:** Java Server Pages (JSP), Servlets, HTML, CSS
- **Version Control:** Git , GitHub
- **Tools:** Maven , Postman
- **Databases:** SQL, MY- SQL
- **Framework:** MVC(JAVA) , Spring Boot

ACADEMIC DETAILS

Degree	Specialization	Institute	Year	CPI/%
B. Tech	*Information Technology*	Medi-caps University	2022-present	8.50
Class XII	*Physics, Chemistry, Mathematics*	Choithram School , Indore	2021-2022	73
Class X		Choithram School , Indore	2019-2020	87.6

INTERNSHIP

- **GAIL India** [June ’25 - July ’25]
  - Studied pipeline communication networks, focusing on message transformation, data flow, and transmission proto- cols within industrial systems.
  - Proposed the integration of AI/ML models for predictive analysis and anomaly detection to enhance operational efficiency and decision-making.

PROJECTS

Movie Ticket Booking System **GitHub:** https://github.com/savitar007-droid/movieticket.git

- Developed a dynamic movie ticket booking web application using JDBC, Servlets, JSP, and SQL, enabling users to view movies, check showtimes, and book or cancel tickets securely.

GitHub: https://github.com/savitar007-droid/movieticket.git

- **Technologies**: Java, JDBC, SQL, JSP, Servlet, HTML, CSS, JavaScript, Eclipse IDE

- **Online Marketplace with Warehouse Storage** [February ’25 - May ’25]
  - Designed an online marketplace where users can purchase, sell, and store items, and relocation and space optimization are simpler. .
  - **Technologies**: Java (Servlets, JSP), MySQL, HTML, CSS.

Wordle Game **GitHub:** https://github.com/savitar007-droid/Wordle.git

- Developed a wordle game where user gets 6 chances to guess the word if he guesses a word and its letter matches with actual word than color of those letters change guiding user towards the ans. It also contains three different modes and statistics page also.
- **Technologies**: Java Spring Boot , HTML , CSS , JavaScript , MySQL

CERTIFICATE

- Java core+ advance (Online school of programming)

EXTRA-CURRICULAR ACTIVITIES

- **Participation**
  - Participate in National Science Competition at Medi-caps University
  - Participate in Smart India Hackathon and selected as top team from college
