SUMMARY

Detail-oriented Information Technology undergraduate with strong interest in DevOps, cloud computing, and automation. Currently building hands-on skills in Linux, Git, Docker, CI/CD concepts, and AWS fundamentals. Strong foundation in Java-based backend systems and SQL, with interest in deployment workflows, system reliability, and continuous integration.

SKILLS

- **Programming Languages:** Java (Core & Advanced)
- **Build Tools:** Maven
- **Version Control:** Git , GitHub
- **Operating Systems:** Linux (Ubuntu – fundamentals)
- **Cloud Platforms:** AWS (EC2, S3, IAM – fundamentals)
- **Containerization:** Docker
- **CI/CD Concepts:** Jenkins, GitHub Actions
- **Infrastructure Concepts:** Terraform (learning)
- **Networking:** TCP/IP, DNS, HTTP/HTTPS (fundamentals)
- **Databases:** SQL, MySQL

ACADEMICS

B.Tech – Information Technology
Medi-Caps University, Indore | 2022–Present | CGPA: 8.5

Class XII (PCM) – **Choithram School, Indore | 73%**
Class X – **Choithram School, Indore | 87%**

INTERNSHIP

- **GAIL India** [June ’25 - July ’25]
  - Studied pipeline communication networks, focusing on message transformation, data flow, and transmission protocols within industrial systems.
  - Proposed the integration of AI/ML models for predictive analysis and anomaly detection to enhance operational efficiency and decision-making.

PROJECTS

- **Movie Ticket Booking System** [May ‘25- June ’25]

  Developed a Java-based web application using **Servlets, JSP, JDBC, and MySQL** that allows users to view movies and book or cancel tickets. Implemented role-based authentication and backend database operations following **MVC architecture**.

- **Online Marketplace with Warehouse Storage** [February ’25 - May ’25]

  Built a backend-driven marketplace system for product listing, purchasing, and warehouse inventory management using **Java and MySQL**. Focused on authentication, database connectivity, and structured backend logic.

- **AI-Resume Analyzer** [September’25 - November’25]

  Created an NLP-based system using **Python** to extract resume information and generate job-match insights, helping automate resume screening and analysis.

CERTIFICATE

Java Core & Advanced , C/C++ Programming

EXTRA-CURRICULAR ACTIVITIES

- **Participation**
  - Participate in National Science Competition at Medi-caps University
  - Participate in Smart India Hackathon and selected as top team from college
